

ENVIRONMENTAL POLICY

We are an Electrical Company who have successfully carried out testing and commissioning projects throughout the Western Australian Metro and Pilbara Region.

Our objective is to ensure we continually and consistently manage environmental risk in our business.

We are committed to environmental sustainability and delivering projects with minimal impact to the environment.

To achieve our commitment we will:

- COMMUNICATE** Communicate our Environmental Policy with everyone who works with us so they are aware of their obligations and our systems and procedures.
- PROVIDE** Provide and maintain an environmental management system based on the requirements of AS/NZS ISO 14001
- COMPLY** Comply with legislative obligations, specification, codes and contractual requirements
- MINIMISE** Minimise impacts to the surrounding environment and community
- IDENTIFY** Identify cost effective sustainable options in all aspects of our business to minimise the impact to the surrounding environment and community
- IMPROVE** Seek to continually improve our environmental systems by identifying methods that enhance environmental sustainability and minimise the impact to the environment.

We believe operating our business to minimise environmental impacts is vital to the sustainability of the environment for future generations. We are collectively responsible for implementing and complying with this policy and the requirements and duties set out in our Environmental Management System.
